

a Probability diagnosis and confidence-based record selection

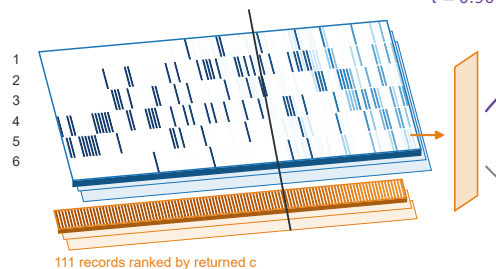

Probability shape

$$H(p) = -\sum_i p_i \log p_i / \log 6$$

Entropy is a separate diagnostic

Link p and c by record identity

Retain 67

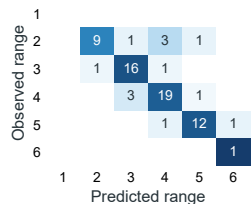

$\tau = 0.90$

Coverage 60.4% / MAE 0.079

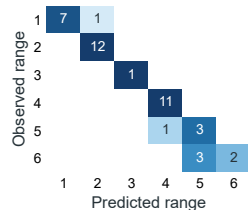

Review 44

Darker output tiles encode larger errors

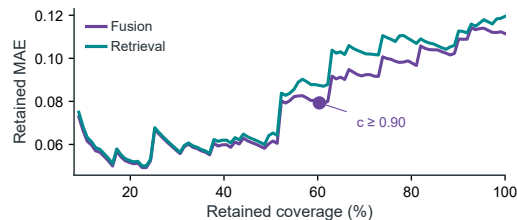

b Pb range confusion

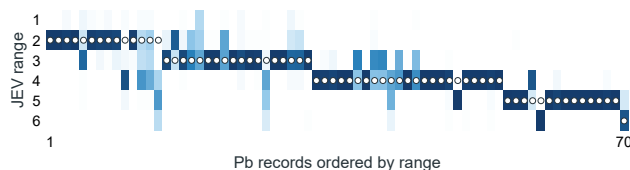

c Cd range confusion

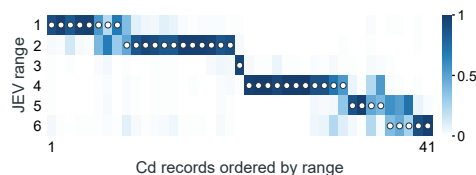

d Error versus retained coverage

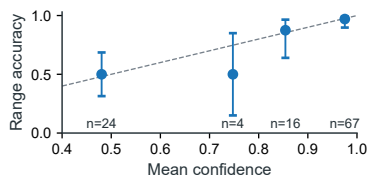

e Pb record probabilities

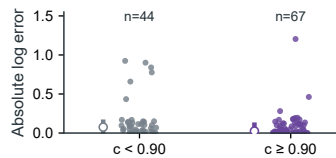

f Cd record probabilities

g Confidence and range accuracy

h Confidence-conditioned error

i Probability entropy
